Clinical Example Report
Attn: Example Reports
200 Welsh Road
Horsham, PA 19044

Patient Name 2090U
Patient ID 2090U
Chain 17002390
Age Not Given **DOB** Not Given
Gender Not Given
Workorder 17002390

Received 12/26/2017 09:49

Sample ID 17002390-001
Matrix Urine
Patient Name 2090U
Patient ID 2090U
Container Type Clear vial

Collect Dt/Tm Not Given
Source Not Given

Approx Vol/Weight Not Given

Receipt Notes None Entered

Analysis and Comments	Result	Units	Reporting Limit	Notes
2090U Fluoride, Urine				
Analysis by Ion Specific Electrode (ISE)				
Fluoride	None Detected	mg/L	0.20	
Normally less than 2 mg/L. The concentration is dependent on dietary intake. The ACGIH Biological Exposure Index (BEI) for monitoring workplace exposure to fluorides measured in urine specimens collected prior to shift is 2 mg/L and in urine specimens collected at the end of shift is 3 mg/L				

Specimens for elemental testing should be collected in certified metal-free containers. Elevated results for elemental testing may be caused by environmental contamination at the time of specimen collection and should be interpreted accordingly. It is recommended that unexpected elevated results be verified by testing another specimen.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
