Patient ID 4150P-POS
Container Type Clear vial

Collect Dt/Tm Not Given
Source Not Given

Approx Vol/Weight Not Given

Receipt Notes None Entered

Analysis and Comments	Result	Units	Reporting Limit	Notes
4150P Salvinorin B, Plasma				
Analysis by High Performance Liquid Chromatography/ Tandem Mass Spectrometry (LC-MS/MS)				
Salvinorin B	50	ng/mL	1.0	
Synonym(s): Salvia				
Salvinorin B is a minor alkaloid in the Salvia Divinorum plant, although present in much smaller amounts than Salvinorin A. Salvinorin B is believed to be the major metabolite of Salvinorin A. Salvinorin B is also formed from Salvinorin A during sample storage. There are currently no reference concentrations or reliable pharmacokinetic data available for Salvinorin B. Some Salvinorin B measured in a plasma sample may reflect breakdown of Salvinorin A after collection.				

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
