Analysis and Comments	Result	Units	Reporting Limit	Notes
9122U Bupropion and Metabolite Screen, Urine				
Analysis by High Performance Liquid Chromatography/ Tandem Mass Spectrometry (LC-MS/MS)				
Bupropion	See Comment	ng/mL	10	
Synonym(s): Wellbutrin®				
Less than 0.5% of an oral dose is excreted unchanged in urine. Specimens must be kept frozen. If specimens are not kept frozen, this may cause lower or negative result values.				
Hydroxybupropion	See Comment	ng/mL	100	
Synonym(s): Bupropion Metabolite				
Comment: Based on this screening result, confirmation testing was performed. Refer to the confirmation test result(s).				
Urinary elimination of hydroxybupropion accounts for approximately 4% of a bupropion dose				

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
