Patient Name 0460TI-POS
Patient ID 0460TI-POS
Chain 17000675
Age Not Given **DOB** Not Given
Gender Not Given
Workorder 17000675

Received 04/06/2017 08:31

Sample ID 17000675-001
Matrix Tissue
Patient Name 0460TI-POS
Patient ID 0460TI-POS
Container Type Clear vial

Collect Dt/Tm Not Given
Source Not Given

Approx Vol/Weight Not Given

Receipt Notes None Entered

Analysis and Comments	Result	Units	Reporting Limit	Notes
0460TI Arsenic, Tissue				
Analysis by Inductively Coupled Plasma/Mass Spectrometry (ICP/MS)				
Arsenic	1.0	mcg/g	0.040	
For most soft tissues, normally: Less than 0.10 mcg/g. Concentrations vary by organ, diet, environment, form of arsenic, time since exposure etc. Not for clinical diagnostic purposes.				

Specimens for elemental testing should be collected in certified metal-free containers. Elevated results for elemental testing may be caused by environmental contamination at the time of specimen collection and should be interpreted accordingly. It is recommended that unexpected elevated results be verified by testing another specimen.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
