Clinical Example Report
Attn: Example Reports
200 Welsh Road
Horsham, PA 19044

Patient Name 4046SP-POS
Patient ID 4046SP-POS
Chain 14001632
Age Not Given **DOB** Not Given
Gender Not Given
Workorder 14001632

Received 06/16/2014 10:34

Sample ID 14001632-001
Matrix Serum or Plasma
Patient Name 4046SP-POS
Patient ID 4046SP-POS
Container Type Clear vial

Collect Dt/Tm Not Given
Source Not Given

Approx Vol/Weight Not Given

Receipt Notes None Entered

Analysis and Comments	Result	Units	Reporting Limit	Notes
4046SP Pyrrolidinophenone Panel (Qualitative), Serum/Plasma				
Analysis by High Performance Liquid Chromatography/ Tandem Mass Spectrometry (LC-MS/MS)				
MePPP	Positive	ng/mL	5.0	
Synonym(s): 4'-methyl -alpha-Pyrrolidinopropiophenone				
MePPP is a psychoactive stimulant of the pyrrolidinophenone series that is structurally related to pyrovalerone and alpha PVP. In general, psychoactive stimulants have temporary effects on the psychoneurotic system. In addition, they seem to have a much higher tendency to cause side effects such as paranoia, hallucinations, and schizophrenic or psychosis like symptoms.				
Alpha PPP	Positive	ng/mL	5.0	
Synonym(s): alpha-Pyrrolidinopropiophenone

Analysis and Comments	Result	Units	Reporting Limit	Notes
Alpha PPP is a psychoactive stimulant of the pyrrolidinophenone series that is structurally related to pyrovalerone and alpha PVP. In general, psychoactive stimulants have temporary effects on the psychoneurotic system. In addition, they seem to have a much higher tendency to cause side effects such as paranoia, hallucinations, and schizophrenic or psychosis like symptoms.				
Alpha PBP	Positive	ng/mL	5.0	
Synonym(s): alpha-Pyrrolidinobutiophenone				
Alpha PBP is a psychoactive stimulant of the pyrrolidinophenone series that is structurally related to pyrovalerone and alpha PVP. In general, psychoactive stimulants have temporary effects on the psychoneurotic system. In addition, they seem to have a much higher tendency to cause side effects such as paranoia, hallucinations, and schizophrenic or psychosis like symptoms.				

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
