1272U Citalopram, Urine

Analysis by High Performance Liquid Chromatography/Tandem Mass Spectrometry (LC-MS/MS)

Citalopram / Escitalopram	50	ng/mL	5.0	
Synonym(s): Celexa®/Lexapro®				

At steady-state, approximately 23% of an oral dose is excreted into the urine as unchanged drug.

This test is not Chiral specific. Patients who have taken Escitalopram (Lexapro®), as opposed to Racemic Citalopram (Celexa®), within the past 3 days may have falsely elevated values.
