**1272U Citalopram, Urine**

Analysis by High Performance Liquid Chromatography/Tandem Mass Spectrometry (LC-MS/MS)

Citalopram / Escitalopram Synonym(s): Celexa®/Lexapro®	None Detected	ng/mL	5.0	
---	---------------	-------	-----	--

At steady-state, approximately 23% of an oral dose is excreted into the urine as unchanged drug.

This test is not Chiral specific. Patients who have taken Escitalopram (Lexapro®), as opposed to Racemic Citalopram (Celexa®), within the past 3 days may have falsely elevated values.
