**2425SP Ipecac Use Markers Screen, Serum/Plasma**

Analysis by High Performance Liquid Chromatography/  
Tandem Mass Spectrometry (LC-MS/MS)

Emetine	None Detected	ng/mL	2.5	
Synonym(s): Ipecac				

Emetine is absorbed after oral administration, although vomiting may remove from 10% to nearly 100% of a dose. Blood concentrations of Emetine were measurable in only 6 of 10 emergency room adult patients who received 30 mL of ipecac syrup for treatment of drug or chemical overdose; the levels varied from 5 - 75 ng/mL within 2 hours of administration.

Cephaeline	None Detected	ng/mL	2.5	
Synonym(s): Ipecac Syrup Constituent				

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
