6920H Cocaine and Metabolites Screen, Hair

Analysis by Enzyme-Linked Immunosorbent Assay (ELISA)

Cocaine / Metabolites See Comment ng/g 500

Comment: Based on this screening result, confirmation testing was performed. Refer to the confirmation test result(s).

Hair Length 10 cm

Head Hair: Hair collected from the back of the head grows at a rate of approximately 1 centimeter (cm) per month with some individual variability.

Body Hair: Body hair grows at a rate of approximately 0.5 centimeters (cm) per month. However, because body hair has a longer period of growth latency, the period of time represented by any portion of body hair is more variable than for head hair.
