

Designer Stimulants Testing MDPV, Mephedrone (“Bath Salts”)

Routine drug tests do not detect the synthetic stimulants found in “bath salts” and “plant food.” NMS Labs now offers **quantitative testing** for these key ingredients - MDPV* and Mephedrone.**

With increased public interest and concern related to synthetic stimulants (such as those implicated in “bath salts”), law enforcement agencies, DREs, crime laboratories and healthcare providers need access to specialized Drug Impaired Driving/DRE Toxicology testing services.

NMS Labs offers quantitative testing for MDPV and Mephedrone in **blood, urine** and **serum/plasma** using

LC-MS/MS; therefore, a tool is now available for law enforcement officials to help regulate this new phenomenon.

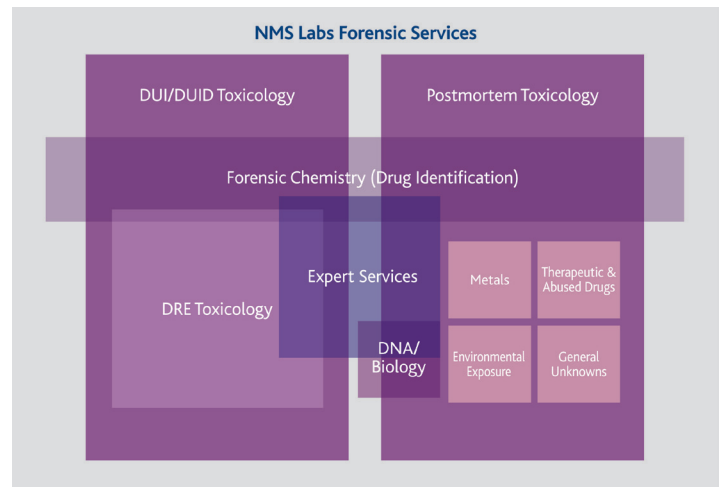

* MDPV is also known as Methylenedioxypyrovalerone, Cloud 9, Ivory Wave, Ocean, Charge Plus, White Lightning, Scarface, Hurricane Charlie, Red Dove, and White Dove.

** Mephedrone is also known as 4-methylmethcathinone (4-MMC), 4-methylphenedrone, meph, drone, MCAT and meow meow.

Designer Drug testing offered by NMS Labs

| | |
|---------------|--|
| 2615B | Mephedrone, Blood |
| 2615U | Mephedrone, Urine |
| 2615SP | Mephedrone, Serum/Plasma |
| 2588B | MDPV, Blood |
| 2588U | MDPV, Urine |
| 2588SP | MDPV, Serum/Plasma |
| 3777B | Piperazines Panel, Blood |
| 3777U | Piperazines Panel, Urine |
| 3777SP | Piperazines Panel, Serum/Plasma |
| 4280U | Synthetic Cannabinoid Metabolites, urine |
| 9560B | Synthetic Cannabinoids Screen (Quant), Blood |
| 9561B | Synthetic Cannabinoids Screen (Qual), Blood |
| 9561U | Synthetic Cannabinoids Screen (Qual), Urine |
