

Toxicology testing designed specifically for drug recognition experts (DRE) and law enforcement

In support of the 12-step DRE protocol, NMS Labs has designed a toxicology service covering the seven DRE drug categories and all the priority drug groups recognized by the National Highway Traffic Safety Administration (NHTSA).

The basic test includes the most commonly abused drugs and can be ordered with various options and additional tests to meet the specific needs of more challenging cases (see below for tests available).

Leading the way in the development of new, hard-to-find tests, NMS Labs is here to assist you in complementing your testing portfolio.

Call your NMS Labs Representative today 866.522.2216 to request a Test Summary Sheet and volume pricing.
