

K2, Spice Testing – Legally Defensible Results

© 2008 Schorle, Wikimedia Creative Commons

NMS Labs offers specialized laboratory testing for synthetic cannabinoids **JWH-018**, **JWH-073**, **JWH-019** and **JWH-250** to support law enforcement agencies, Drug Recognition Experts (DREs), crime laboratories and healthcare providers.

NMS Labs is the *only known commercial lab to perform tests that screen, confirm and quantitate K2* in blood using LC-MS/MS; therefore, a tool is now available for law enforcement officials to help regulate this new phenomenon with scientifically specific and legally defensible results as the drug becomes illegal in more and more locations.

The synthetic cannabinoids tests offered by NMS Labs include:

JWH-018, JWH-073 and JWH-250 (screened, confirmed & quantitated) in blood
JWH-018, JWH-073, JWH-019 and JWH-250 (screened & confirmed) in blood

When you need to know.®

Drug Impaired Driving/DRE Toxicology

Options

- Alcohol Testing¹
- Expert Opinion Report²

Add-on Tests

- Hallucinogens
- Rx & Therapeutic Drugs or Metabolites
- Inhalants

Specialized Tests

- 1,1 Difluoroethane (DFE)
- Benzylpiperazine (BZP)
- Gamma-Hydroxybutyric Acid (GHB)
- Drug ID (e.g. pills, salvia)
- Salvinorin A and B
- Synthetic Cannabinoids

Ultra Sensitivity Tests

- Low Dose Benzodiazepines
- Low Dose Opiates
- Amphetamines (D/L Ratio)

¹For customers requiring Title 17 Alcohol, an Add-On is available

²Expert opinion available for toxicology testing performed by NMS Labs
