

New Novel Psychoactive Substances (NPS) Continue to Hit the Streets

NMS LABS ANNOUNCES UPDATED TEST OFFERINGS FOR THE LATEST NPS IN THE RAPIDLY CHANGING DESIGNER DRUG ARENA

The headlines are full of alarming & horrific stories—assaults on police officers, violence, suicides, ER visits, psychosis—all attributed to individuals under the influence of the latest round of NPS, or so-called “legal highs.” The rapid turnover of the compounds found in designer drugs challenges the analytical capabilities of most labs, frustrating attempts at deterrence and detection, while encouraging the growth of the market. Designer drug test results may be the key piece of evidence that allows the reliable certification of a death, or explains a subject’s behavior in a medical or criminal case. As a result, *consider testing for the newest compounds as standard practice.*

New! 1485 Designer Opioids - Blood & Serum/Plasma

AH-7921, Acetyl Fentanyl, Butyryl Fentanyl, MT-45

Updated! 8756 Novel Psychoactive Substances (NPS) Screen 1 - Blood, Serum/Plasma & Urine

New name and scope, the most popular NPS all in one panel

New! 8210 Novel Psychoactive Substances (NPS) Screen 2 - Blood, Serum/Plasma & Urine

Additional NPS varying in popularity, recommended when further testing is required

NMS Labs is committed to continually investing in research & development to meet the challenges of this epidemic. Visit DesignerDrugTrends.org for current information on local laws, national drug scheduling laws, drug sightings, scientific changes, emerging designer drugs and testing trends.

Designer Drug Testing Available from NMS Labs

Novel Psychoactive Substances:

- 2626** - Bath Salts Panel (Blood, Urine, Serum/Plasma)
- 8756** - Novel Psychoactive Substances (NPS) Screen 1 (Blood, Urine, S/P) *Quantitative results for select compounds available soon!*
- 8210** - Novel Psychoactive Substances (NPS) Screen 2 (Blood, Urine, Serum/Plasma)
- 1485** - Designer Opioids (Blood, Urine, Serum/Plasma)
- 3143** - NBOMe (Qualitative) (Blood, Urine, Serum/Plasma)
- 4046** - Pyrrolidinophenone Panel (Qualitative) (Blood, S/P)
- 4047** - Pyrrolidinophenone Panel (Blood, Serum/Plasma)
- 7210** - Comprehensive Stimulants and Hallucinogens Panel (Solid, Liquid)

Synthetic Cannabinoids:

- 9560** - Synthetic Cannabinoids Screen (Blood)
- 9562** - Synthetic Cannabinoid Metabolites Screen - Expanded (Urine) *Recently Updated!*
- 9563** - Synthetic Cannabinoid Metabolites Screen (Urine)
- 9567** - Synthetic Cannabinoids Screen (Oral Fluid)
- 7472** - Synthetic Cannabinoids Investigation (Solid)
- 7473** - Comprehensive Drug Panel including Synthetic Cannabinoids and Designer Drugs (Solid)
