

# NMS Labs offers a simplified portfolio for Postmortem Toxicology

NMS Labs, the nation's premier independent provider of forensic laboratory services, is proud to offer a simplified portfolio of post-mortem toxicology analyses to meet your needs — every time, in every situation. Select from three levels of fast, ultra-reliable, and re-engineered tests and services:

From the predictable to the complex case, we're helping to put you in control with high-quality choices and delivering value within your budget.

## You Can Expect More from the Industry Leader

With every test and service, you benefit from our position as leaders in experience, innovation, and technology. Regardless of the option you choose, you'll receive the following:

### Largest Toxicology Test Menu Available

Keep up with new drugs when solving complex cases.

### Easy-to-Read Report

Streamlined format to help you find important insights quickly — recap of tests requested, positive findings upfront, detailed findings for positive results. Includes current Toxicologist-authored reference comments, pulled from NMS Labs extensive library containing thousands of regularly reviewed comments.

### Updated Analyses

Including a more relevant and current selection of commonly abused and prescription drugs, metabolites, poisons, and toxins.

### Low Detection & Reporting Limits

Identification of low or trace levels of a drug can aid in death investigations.

### A Scientific Staff of Over 200

Includes leading board-certified toxicologists, experienced in analyzing and providing expert legal opinions on some of the most complex cases.

### State-of-the-Art Technologies

Highest quality instrumentation, including 20+ LC-MS/MS and ICP-MS systems.

The Only Independent Forensic Facility in the Nation  
Accredited by ABFT and ASCLD/LAB\*\*

## POSTMORTEM TOXICOLOGY

TESTING AND SERVICES FOR  
CORONERS & MEDICAL EXAMINERS

# THREE LEVELS OF POSTMORTEM TOXICOLOGY TESTS & SERVICES FROM WHICH TO CHOOSE! SELECT THE ONE THAT MAKES THE MOST SENSE TO YOU.

## BASIC Postmortem Toxicology

- ▲ Basic offering of drugs of abuse and alcohol
- ▲ All sample types\*

8051: BASIC Postmortem Toxicology

8051B plus 8050U: BASIC Postmortem Toxicology for blood, plus urine drug screen with 6-MAM

## EXPANDED Postmortem Toxicology

- ▲ Basic offering, plus predefined selection of abused drugs (*including bath salts*), therapeutic drugs or metabolites, and alcohol
- ▲ All positive findings confirmed and quantitated
- ▲ All sample types\*

8052: EXPANDED Postmortem Toxicology

8052B plus 8050U: EXPANDED Postmortem Toxicology for blood, plus urine drug screen with 6-MAM

## EXPERT Postmortem Toxicology

- ▲ Large library of relevant drugs, metabolites, poisons and toxins for comprehensive death investigation
- ▲ Case history evaluation and guidance by a leading NMS Labs Toxicologist
- ▲ Case conference participation
- ▲ Reporting of trace results
- ▲ Specimen collection kit optimized for accuracy of analyte detection
- ▲ All sample types\*

8092: EXPERT Postmortem Toxicology
