

## **Collaboration is key as NMS Labs introduces its wiki**

### ***FOR IMMEDIATE RELEASE***

**WILLOW GROVE, PA, February 24**—NMS Labs announced today the launch of its lab testing wiki. This web-based interactive format will support both forensic and health care services by providing general access to information developed by experts. NMS Labs invites thought leaders to contribute and rate content on forensic and clinical toxicology, clinical endocrinology, and criminalistics testing. The general public can view the content at [www.nmslabs.wikispaces.com](http://www.nmslabs.wikispaces.com). This perpetual collective work will contain current technical content qualified by a network of qualified scientists and practitioners.

Dr. Eric Rieders, President and CEO of NMS Labs explains, “This wiki is aligned with the way that the scientific community currently communicates. At NMS Labs, we are constantly looking to improve upon access to relevant information targeting the needs of our clients. The NMS Labs wiki provides industry thought leaders with a forum to develop high quality informational content towards that end.”

NMS Labs is believed to be the first to create such a forum for this type of information and has been filling a blog for over six months with current topics on forensic toxicology and health care issues.

### **About NMS Labs:**

NMS Labs is the go-to lab for healthcare providers system needing state-of-the-art tests that other labs don't provide as well as the routine. A national reference laboratory, NMS Labs is unsurpassed in its scope of tests, accuracy of results, scientific expertise, and innovation. NMS Labs is passionate about promoting public health and safety. For more information on NMS Labs please visit [www.nmslabs.com](http://www.nmslabs.com) and the blog at [www.nmslabs-blog.com](http://www.nmslabs-blog.com).

NMS Labs: When you need to know.™
