

# Salvia (Salvinorin A) Identification in Liquids and Solid Samples

## Salvia – Controlled in Fifteen States\*...and Growing

**NMS Labs** continues its commitment to delivering innovative new tests with the addition of Salvinorin A identification in liquids and solid samples (including plant material). Salvinorin A is the main psychoactive ingredient in the potent hallucinogenic herb *Salvia Divinorum*.

**7461LI Salvinorin A Identification, Liquid**

**7461SL Salvinorin A Identification, Solid**

\* As of April 2009, several countries and fifteen U.S. states had scheduled or otherwise regulated the sale or distribution of *Salvia*. Those states are DE, FL, IL, KS, MS, MO, ND, OK, VA, CA, LA, ME, NE, TN, OH. Legislation is pending in several other states.

Let NMS Labs help you to be prepared.

### ADDITIONAL TESTING AVAILABLE FROM NMS LABS CRIME LAB

7461LI Salvinorin A Identification, Liquid

7461SL Salvinorin A Identification, Solid

6210LI General Unknown Analysis, Liquid

6210SL General Unknown Panel, Solid

7201SL Controlled Substances, Solid (e.g. pill ID)

7201LI Controlled Substances, Liquid

7300SL DNA Analysis, Organic

7306SL DNA Analysis, Y-STR

7307SL DNA Analysis, Half Profile

7125LI ABO Blood Typing, Blood

7430SL Semen Identification

NMS Labs has helped with controlled substance backlog reduction projects for several state crime labs. Contact us for assistance with your backlog.
