

# New Synthetic Cannabinoids are Now Detectable

**STATIC DRUG SCREENS DO NOT DETECT NEWER COMPOUNDS. NMS LABS' EVOLVING, COMPREHENSIVE BLOOD SCREEN MATCHES THE MOST POPULAR DRUGS ON THE STREET.**

NMS Labs has continually invested in research and intelligence gathering, then rapid test development and thorough validation, to ensure we are offering testing for the most current synthetic cannabinoids in the Novel Psychoactive Substances (NPS) arena. Analysis of the illicit drug marketplace and the latest trends has led NMS Labs to add 13 key new compounds to the scope of the test, and retire older compounds that are no longer in circulation. Our commitment to forensic defensibility means that compounds identified in this screen will be confirmed by additional testing, included in the price of the test.

## **9560B Synthetic Cannabinoids Screen (2016 Scope), Blood**

The 2016 update includes testing for 5F-AMB, 5F-ADB, FUB-144, FUB-JWH-018, EG-2201, MMB-CHMINACA, NM-2201, MA-CHMINACA, FUB-AMB, AMB, PX1, PX2, and APP-CHMINACA, as well as the remaining popular compounds from last year's menu.

### **DETECT EMERGING COMPOUNDS!**

New compounds, especially opioids, are appearing in treatment facilities, emergency rooms via DUID arrests, and Medical Examiner offices.

NMS Labs is actively adding newly emerging compounds, such as:

**U-47700**

**4-ANPP**

**Furanyl Fentanyl**

If any of these compounds are found in the testing process, NMS Labs may contact you to discuss additional testing options for your case.

### **Novel Psychoactive Substances (NPS) Testing Available from NMS Labs**

- 8756** - Novel Psychoactive Substances (NPS) Screen 1 (Blood, Urine, Serum/Plasma)
- 8210** - Novel Psychoactive Substances (NPS) Screen 2 (Blood, Urine, Serum/Plasma)
- 9560** - Synthetic Cannabinoids Screen (2016 Scope) (Blood)
- 9562** - Synth. Cannabinoid Metabs. Screen - Expanded (Urine)
- 9563** - Synthetic Cannabinoid Metabolites Screen (Urine)
- 9567** - Synthetic Cannabinoids Screen (Oral Fluid)
- 2626** - Bath Salts Panel (Blood, Urine, Serum/Plasma)
- 1485** - Designer Opioids (Blood, Urine, Serum/Plasma)
- 3143** - NBOMe (Qualitative) (Blood, Urine, Serum/Plasma)
- 1021** - Substituted Cathinone Panel (Blood, Urine, S/P)
- 27200** - Non-Law Enforcement, Comprehensive Drug Panel including Synthetic Cannabinoids
