nmslabs.com

Place your orders and get test results entirely online.

Speed, efficiency and accuracy are just a click away.

NMS Labs Web Portal is better than ever— your one-stop cyber shop for all your lab test needs. Setting up your account takes only minutes and you'll save hours in paperwork, faxing and calling.

Place your online test order in as little as 23 seconds.

With our common test ordering function, you can view a list of the tests you order most. Then, just fill in the patient or case information, select the tests you need, transmit your order, and you're done.

Far better accuracy, far fewer mistakes. Since everything in our portal is typed, clear and ready to go— there's no handwriting to misinterpret or communication mix ups. Using barcode technology, we crosscheck the samples you send us against your online order for assurance and accuracy.

Better security with individual passwords. Now, multiple users from the same organization can sign in with their own passwords... helping to reduce the risk of information getting into the wrong hands.

Want your results? Just check your portal inbox.

Your test results are securely posted as soon as we have them... no waiting.

Access past reports, anytime. Our new portal stores past reports for easy reference. It's all online— go green!
