Horsham, PA 19044

Patient Name 0460B
Patient ID 0460B
Chain 18000959
Age Not Given **DOB** Not Given
Gender Not Given
Workorder 18000959
Received 08/06/2018 14:11

Sample ID 18000959-001
Matrix Blood
Patient Name 0460B
Patient ID 0460B
Container Type Clear vial

Collect Dt/Tm Not Given
Source Not Given

Approx Vol/Weight Not Given

Receipt Notes None Entered

Analysis and Comments	Result	Units	Reporting Limit	Notes
-----------------------	--------	-------	-----------------	-------

0460B Arsenic, Blood

Analysis by Inductively Coupled Plasma/Mass Spectrometry (ICP/MS)

Arsenic	None Detected	mcg/L	5.0	
---------	---------------	-------	-----	--

Normally: Less than 10 mcg/L.
Seafood consumption within 2 to 3 days before specimen collection can markedly increase total Arsenic levels.

Various states require that levels above certain cutoffs must be reported to the state in which the patient resides.
Please contact NMS Labs if you need assistance in supplying your state with the required information.

Specimens for elemental testing should be collected in certified metal-free containers. Elevated results for elemental testing may be caused by environmental contamination at the time of specimen collection and should be interpreted accordingly. It is recommended that unexpected elevated results be verified by testing another specimen.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
