Table with 5 columns: Analysis and Comments, Result, Units, Reporting Limit, Notes

1272U Citalopram, Urine

Analysis by High Performance Liquid Chromatography/
Tandem Mass Spectrometry (LC-MS/MS)

Citalopram / Escitalopram 50 ng/mL 5.0
Synonym(s): Celexa®/Lexapro®

At steady-state, approximately 23% of an oral
dose is excreted into the urine as unchanged drug.

This test is not Chiral specific. Patients who have
taken Escitalopram (Lexapro®), as opposed to Racemic
Citalopram (Celexa®), within the past 3 days may have
falsely elevated values.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US
Food and Drug Administration.
