Analysis and Comments

2090SP Fluoride, Serum/Plasma
Analysis by Ion Specific Electrode (ISE)

Fluoride

Result  Units  Reporting Limit  Notes
0.50    mg/L  0.050     ELEVATED

Reference range: Generally less than 0.13 mg/L.
The reference range is dependent on the level of water fluoridation and its consumption.

Specimens for elemental testing should be collected in certified metal-free containers. Elevated results for elemental testing may be caused by environmental contamination at the time of specimen collection and should be interpreted accordingly. It is recommended that unexpected elevated results be verified by testing another specimen.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
