2460SP Itraconazole, Serum/Plasma

Analysis by High Performance Liquid Chromatography/
Tandem Mass Spectrometry (LC-MS/MS)

Itraconazole	5.0	mcg/mL	0.050	ELEVATED
Synonym(s): Sporanox®				

Under therapeutic steady-state conditions with twice daily oral doses of 200 mg, plasma itraconazole concentrations were 1.9 +/- 0.45 mcg/mL. A trough serum level greater than 0.25 mcg/mL is necessary for effective protection against fungal infection.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
