Clinical Example Report
Attn: Example Reports
200 Welsh Road
Horsham, PA 19044

Patient Name 2492B

Patient ID 2492B

Chain 22000447

DOB Not Given

Sex Not Given

Workorder 22000447

Received 01/25/2022

Lab ID 22000447-001

Matrix Blood

Patient Name 2492B

Patient ID 2492B

Container Type Red top vial

Collect Dt/Tm Not Given

Source Not Given

Approx Vol/Weight Not Given

Receipt Notes None Entered

Analysis and Comments	Result	Units	Reporting Limit	Notes
-----------------------	--------	-------	-----------------	-------

2492B Lead, Blood

Analysis by Inductively Coupled Plasma/Mass Spectrometry (ICP/MS)

Lead	None Detected	mcg/dL	0.50	
------	---------------	--------	------	--

The U.S. Centers for Disease Control and Prevention (CDC) reference value based on the 97.5th percentile of the blood lead level distribution in U.S. children aged 1-5 years is 3.5 mcg/dL.

The U.S. Centers for Disease Control and Prevention (CDC) blood lead reference level for adults is less than 5 mcg/dL.

Refer to OSHA's website for workplace information.

Various states require that levels above certain cutoffs must be reported to the state in which the patient resides.

Please contact NMS Labs if you need assistance in supplying your state with the required information.

Specimens for elemental testing should be collected in certified metal-free containers. Elevated results for elemental testing may be caused by environmental contamination at the time of specimen collection and should be interpreted accordingly. It is recommended that unexpected elevated results be verified by testing another specimen in a trace metal free container.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
