2810FL Methamphetamine and Metabolite, Fluid

Analysis by High Performance Liquid Chromatography/
Tandem Mass Spectrometry (LC-MS/MS)

Amphetamine Synonym(s): Methamphetamine Metabolite	None Detected	ng/mL	5.0	
Methamphetamine	None Detected	ng/mL	5.0	

This test reports Methamphetamine as the total of the undifferentiated d and l enantiomers. The ratio of these enantiomers is important in determining whether the source of Methamphetamine is from over the counter medications, prescribed medication or controlled substances. Call lab for further information on d to l enantiomer ratio determination.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
