Analysis and Comments	Result	Units	Reporting Limit	Notes
2835FL Methanol, Fluid				
Analysis by Headspace Gas Chromatography (GC)				
Methanol	20	mg/dL	5.0	
Synonym(s): Methyl Alcohol				
Methanol is contained in paints, cleaners, windshield washer fluid, 'canned heat', and other household products. It may be consumed for its intoxicating properties which are similar to ethanol; however it is much more toxic. In addition to central nervous system depression with its associated slowing of reaction time, lethargy and confusion, methanol can cause blindness due to its toxic metabolites.
