Analysis and Comments	Result	Units	Reporting Limit	Notes
-----------------------	--------	-------	-----------------	-------

California OSHA has determined that employees whose urinary levels of MOCA exceed 100 ng/mL with Specific Gravity adjusted to 1.024 shall be tested at least monthly until 2 consecutive samples, taken no less than 3 days apart, have been reduced to below 100 ng/mL.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
