4071B Quinidine, Blood

Analysis by High Performance Liquid Chromatography/Tandem Mass Spectrometry (LC-MS/MS)

Quinidine	500	ng/mL	100	
Synonym(s): Conquinine				

For the treatment of arrhythmia, effective plasma concentrations typically range between 2,000 and 5,000 ng/mL. The blood/plasma ratio is not known for quinidine, but concentrations in red blood cells are usually lower than plasma.
