**6922H Benzodiazepines Screen, Hair**

Analysis by Enzyme-Linked Immunosorbent Assay (ELISA)

Benzodiazepines	None Detected	ng/g	300	
Hair Length	10	cm		

Head Hair:  
Hair collected from the back of the head grows at a rate of approximately 1 centimeter (cm) per month with some individual variability.

Body Hair:  
Body hair grows at a rate of approximately 0.5 centimeters (cm) per month. However, because body hair has a longer period of growth latency, the period of time represented by any portion of body hair is more variable than for head hair.

This test was developed and its performance characteristics determined by NMS Labs. It has not been cleared or approved by the US Food and Drug Administration.
