5684U Amphetamines Confirmation, Urine

Analysis by High Performance Liquid Chromatography/ Tandem Mass Spectrometry (LC-MS/MS)

Table rows for Ephedrine, Pseudoephedrine, Phenylpropanolamine, Norpseudoephedrine, Amphetamine, Phentermine, and Methamphetamine with results and reporting limits.

This test reports Methamphetamine as the total of the undifferentiated d and l enantiomers. The ratio of these enantiomers is important in determining whether the source of Methamphetamine is from over the counter medications, prescribed medication or controlled substances. Call lab for further information on d to l enantiomer ratio determination.
